

Cayo Aguiar do Nascimento

Game Developer | Unity Certified Developer | Full-Stack Developer

Rio de Janeiro, Brazil | cayocan@gmail.com | +55 21 99060-2254 | [linkedin.com/in/cayoaguiar](https://www.linkedin.com/in/cayoaguiar) | [Portfolio](#) | English: B2 (EFSET)

PROFESSIONAL SUMMARY

Full-Stack Developer with 8+ years of experience shipping production software, with a strong focus on game development across mobile, PC, and console platforms. Unity Certified Developer with a proven track record of integrating game clients with backend APIs, porting titles to console (Xbox One / Series X|S), and publishing games on Steam, Google Play, and the Microsoft Store. Led projects end-to-end — from system design and gameplay programming to build pipelines and live deployment. Also experienced in self-directed Web3 development, building on-chain game mechanics and dApps on EVM-compatible networks. Combines solid engineering fundamentals with a player-first mindset and a commitment to craft.

TECHNICAL SKILLS

- **Game Development:** Unity (C#), WebGL, Multiplayer (Photon PUN2), Cross-platform Porting (Mobile, Console, PC), Gameplay Systems, Web3Unity (Chainsafe), IAP, Addressables
- **Frontend:** React, Next.js, Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind
- **Backend:** Node.js, C#, .NET Core, Entity Framework, Python (Flask), REST APIs, Microservices
- **Blockchain & Web3 (personal projects):** Solidity, EVM (Polygon, Ethereum), Ethers.js, Hardhat, NFT Standards (ERC-721, ERC-1155), wagmi/viem
- **Infrastructure & Tools:** Docker, CI/CD, Git/GitFlow, AWS, Firebase, PostgreSQL, MySQL
- **AI-Assisted Development:** Prompt Engineering, GitHub Copilot, Cursor, MCP (Model Context Protocol), Claude API

PROFESSIONAL EXPERIENCE

Unity Developer & Project Manager | [MZ Unlimited](#) | 2023 – 2025

- Led development of a professional social network with a Unity client integrated with a Python/Flask REST API
- Managed project scope, requirements gathering, and technical decision-making across the full product lifecycle
- Delivered cross-platform features coordinating design, backend, and client teams

Game Developer (Porting) | [Dumativa](#) | 2021 – 2023

- Ported ShieldMaiden: Remix Edition to Xbox One and Xbox Series X|S — published on the Microsoft Store in 2023
- Implemented cloud saves, Xbox controller support, and platform-specific rendering and performance optimizations
- Maintained build pipelines and resolved compatibility and input issues across platforms

CEO & Full-Stack Developer | [Dreamlight Game Studio](#) | 2019 – 2021

- Founded and led an independent game studio, shipping multiple Unity titles to Steam
- Developed Grave Knight (interactive RPG Visual Novel — 70k+ words, dice combat, 3 playable classes) and Peg Adventure: Solo Noble (puzzle game with 43 Steam achievements)
- Built full-stack systems with REST API backends to support game applications and services

Unity C# Developer | [Arcolabs](#) | 2017 – 2019

- Developed Disney Play Educa — an educational mobile platform with 100+ interactive activities using licensed Disney characters, published on Android, iOS, and WebGL
- Implemented IAP, Addressables-based content pipeline via REST API + CDN, integrated with a .NET/Entity Framework backend on AWS
- Participated in Global Game Jam 2018, developing Crossbar — published on itch.io

GAME PROJECTS

Disney Play Educa (Arcolabs — 2017–2019)

Educational platform with 100+ interactive activities featuring licensed Disney characters for children. Published on Android, iOS, and WebGL with dynamic content delivery via CDN and in-app purchases.

Stack: Unity, C#, .NET API, Entity Framework, AWS, IAP, Addressables, Android, iOS, WebGL

ShieldMaiden: Remix Edition (Dumativa — 2023)

Console port of a pixel art action-adventure game to Xbox One and Xbox Series X|S. Synthwave atmosphere, 4 areas, epic bosses, and cloud saves. Published on the Microsoft Store.

Stack: Unity, C#, GDK, Xbox One, Xbox Series X|S, Cloud Saves | [Microsoft Store](#)

Grave Knight (Dreamlight Game Studio — Steam)

Interactive RPG Visual Novel with 70k+ words, dice-based combat, 3 playable classes, and non-linear narrative inspired by the SRD 5.1. Published on Steam.

Stack: Unity, C# | [Steam](#)

Peg Adventure: Solo Noble (Dreamlight Game Studio — Steam)

Casual puzzle game based on the classic peg solitaire. Unlock levels by clearing challenges with max performance and collect 43 Steam achievements. Published on Steam.

Stack: Unity, C# | [Steam](#)

Truzzle (Dreamlight Game Studio — Steam)

Casual puzzle game with 80+ handcrafted levels featuring rotations, teleports, and moving pieces with increasing difficulty. Published on Steam.

Stack: Unity, C# | [Steam](#)

UTC Não Pode Rir (Android — Google Play)

Official licensed app by the Castro Brothers. Players try not to laugh at absurd challenges. Free with 1,000+ downloads on Google Play.

Stack: Unity, C#, Android | [Google Play](#)

Crossbar (Global Game Jam 2018 — itch.io)

Game developed at Global Game Jam 2018. Play as a telephone switchboard operator connecting transmissions under pressure before getting fired.

Stack: Unity, C#, Android, Windows | [itch.io](#)

OTHER PROJECTS (WEB3 & AI)

VaultPass — NFT Access Infrastructure

White-label platform for creating, distributing, and monetizing Access Pass NFTs. Organizations can gate content, events, and services behind on-chain credentials.

Stack: Solidity (ERC-1155), Hardhat, Polygon, Node.js + Fastify, Prisma + PostgreSQL, viem + wagmi, Next.js 14 + shadcn/ui | <https://github.com/web3-portfolio-projects/vaultpass>

Block Jar Tip — Web3 Tipping dApp

Merchants deploy their own tipping smart contract, generate a unique QR/link, and receive on-chain tips with optional messages.

Stack: Solidity, Hardhat, Node.js + Express, React + TypeScript, wagmi, viem | <https://github.com/web3-portfolio-projects/block-jar-tip>

eth-agents — Multi-Agent System for Ethereum (Open Source)

Claude Code plugin with 10 specialized AI agents for Ethereum smart contract development. Automates analysis, generation, and auditing via MCP.

Stack: TypeScript, MCP (Model Context Protocol), Claude API, Solidity | <https://github.com/cayocan/eth-agents>

EDUCATION & CERTIFICATIONS

- **Degree:** Systems Analysis and Development — Instituto Infnet (2014–2018)
- **Certification:** Unity Certified Developer — Unity Technologies (Cert. 201706UCD2322)
- **Specializations:** Web3 Fundamentals — Nearx; C# I, II, III — Alura
- **Languages:** English B2 — EFSET Upper Intermediate (C1 in Reading & Listening); Portuguese (native)
